## **The South Country**

She punches me. Fluorescent GNPs can be further functionalized with Raman tags Although Raman imaging is not currently available in the neurosurgical practice, in experimental models, SERS microscopy revealed that GNPs delineate tumor edges, the loco-regional infiltration corresponding to the GBM digitations and even the satellite foci remote from the main tumor mass, strongly correlating with spatial distribution of GBM histological markers 2021Importantly, Raman signal is more stable and intense with respect to fluorescent markers such as 5-ALA Additionally, the photostability of Raman-active GNPs might allow a more persistent signal emission with respect to fluorescent markers.
